WHO WE ARE

Zitec is a professional company which specialises in **the manufacture and design of custom-made electric panels/switchboards.**

Our dynamic entrepreneurial philosophy is based on our expert adaptation to the specific needs of our customers. It always fully complies with the applicable standards and offers full warranties for its products.

Founded in Asturias in 2003, it has a highly qualified professional team with extensive expertise in the electric sector. It invests and places top priority on continuous training, since it is the key axis which assures the development of the personnel and the company.

The Company's Central Office is located in the Business Park: Parque Empresarial de Argame, in a natural environment located in the centre of Asturias, with excellent land and sea transport connections.

High-level efficiency and energy savings are always the Company's primary objectives. As guarantee of its activity, the Company possesses the certifications: Quality System Management (ISO 9001:2008) and the compliance with good environmental practices (ISO 14001:2004).

Zitec is a member of the associations, AMELEC (Spanish Association of Manufacturers and Exporters of Electrical and Electronic Equipment) and the Business Association of Electrical and Telecommunication Installations of Asturias.

CERTIFICATIONS

BUREAU VERITAS
Certification

ZITEC Instalaciones Eléctricas S.L. has made a strong commitment to the environmental improvement of all its activities, resource conservation, pollution prevention and environmental protection.

Zitec has implanted an Environmental Management System which applies to all the activities which can cause a significant environmental impact; and it comprises the comprehensive management and control of materials, waste, landscape and resource consumption.

Continual progress is assured by establishing an Integrated Quality and Environmental Management System based on the requirements established by the Standards UNE-EN-ISO 9001: 2008 and UNE-EN-ISO 14001: 2004, structured by this Quality and Environmental Policy.

ISO 9001 / 2008

ISO 14001 / 2004

**ELECTRIC
PANELS/SWITCHBOARDS**

Design and manufacture of custom-made electric panels/switchboards

Zitec specialises in the premium **design and manufacture of custom-made electric panels/switchboards** for each specific project, based on its own and external engineering.

The manufacture of electric panels/switchboards can be certified subject to IEC or UL standards, using the leading trademarks and top quality materials and components.

We completely adapt to the client's specific requirements and time periods, and also provide an expert advice service during the entire design and manufacture process.

Our deliveries are carried out with certified packaging for land and sea transport.

Power Switchboards

Distribution Switchboards

MCC (Motor Control Centre)

Control Panels and Automation

Work Set Panels

POWER SWITCHBOARDS

1. ATS Automatic transfer switch 1000A
2. Engine with high power starter motor
3. Electric testing
4. ATS Automatic transfer switch 1600A

DISTRIBUTION SWITCHBOARDS

1. Fishing vessel

2. Lighting distribution switchboard 250A

3. Manual transfer switch with bypass 400A

4. Distribution switchboard

MCC

MOTOR CONTROL CENTRE

1. MCC Form 3b (Outside)
2. MCC with PLC
3. Tunnel ventilation MCC
4. MCC Form 3b (Inside)

CONTROL PANELS AND AUTOMATION

1. Control cabin desk
2. Industrial PLC
3. Industrial PLC control in a polyester cabinet
4. Substation control (Relays)

WORK SET PANELS

1. Work set panel 250A IP 55 (Outside)
2. Work set panel 63A IP 65 (Inside)
3. Work set panel 250A IP 55 (Inside)
4. Work set panel 63A IP 65 (Outside)

ZITEC INTERNATIONAL

“We work hard to market custom-made solutions; we also directly tender our products to distributors, engineering and construction firms located in different strategically located markets”.

Zitec's growth and expansion have consolidated its strategy to accompany its clients in various international projects and it has the capacity to export its products and technical know-how to any location worldwide.

In response to the clients' specific requirements, Zitec manages the design, manufacture and shipping of the electric panels to the agreed destination. On demand, Zitec also markets other electrical materials and equipment, strictly fulfilling the time period and warranty terms.
